Pest Control Products

WE HAVE A COMPLETE RANGE
OF PRODUCTS FOR THE CONTROL
OF FLIES AND OTHER
INSECT PESTS

D.D.T. BARN SPRAY —
Quarts — 80c Gals — \$2.50

D.D.T. 25% Concentrate
16 oz. — \$1.25
Barn and Animal spray, makes up
to 75 gallons of spray.

Fly-Kill with D.D.T. —
4 oz. — 25c 16 oz. — 43c
For Household use.

AERASOL BOMB —
WITH D. D. T. — \$4.50
Sufficient for over 100 empty rooms
(Rebate of \$1.70 on empty bomb)

Ant and Roach Powder —
WITH D. D. T. — 50c
In convenient puffer package.

Atox-Derris Powder —
For Cabbage worms, Etc. Non-
poisonous and very efficient.

BERLOU —
16 oz. — \$1.25
For moth proofing woollens, Etc.
Guaranteed — Stops moth damage
for 5 years or Berlou pays the
damage.

THE ABOVE ARE ONLY A FEW
OF THE PRODUCTS WE CARRY
FOR THE CONTROL OF PESTS

Minister Outlines Bird Laws

The Honorable J. Allison Glen, Minister of Mines and Resources, Ottawa has just issued the regulations regarding the migratory birds for the current year.

A summary of the regulations as they apply to Alberta follows.

OPEN SEASONS
Both dates inclusive.

WILSON'S SNIPES
Throughout the province from 1 half hour before sunrise on September 14th to one half hour after sunset on November 9th.

DUCKS AND GEESE other than Ross's Geese, RAILS and COOTS
In that part of Alberta lying north of the right bank of the Athabasca River, along down the stream to its intersection with the north boundary of township 72 and north of the north boundary of Township 72 from the Athabasca River to its intersection with the international boundary between Alberta and Saskatchewan from one half hour before sunrise on September 14th to one half hour after sunset on November 21st.

Throughout the remainder of the province of Alberta: From one half hour before sunrise on September 14th to one half hour after sunset on November 28th.

There is a closed season throughout the year on Eder Ducks, Wood Ducks, Swans, Ross's Geese, Cranes, All Shore birds except Wilson's snipe and all migratory non-game and insectivorous birds.

Migratory birds killed during the open season may be possessed in Alberta at anytime, but the onus of proof that birds thus possessed were lawfully killed shall be on the person having the birds in his possession.

In any day, ducks, 15; of which not more than 8 shall be species other than Mallards; Geese 5; Coots and Rails 25; Wilson's Snipe 5.

In any open season: Ducks, 150; Geese 25; Rails and Coots, 100; Wilson's Snipe, 100.

No one shall have in his possession at any one time more than 60 ducks.

GUNS APPLIANCES, HUNTING METHODS
FORBIDDEN — The use of an automatic, gas-loading, pump, or semi-automatic gun, or rifle, or of any shot gun loaded with a single bullet or any gun larger than number 10 gauge, or any weapon other than a gun or bow and arrow and the use of live birds as decoys, or of any aeroplane, power boat, sail boat, or night light, and shooting from any motor or wheeled vehicle, or a vehicle to which a draught animal is attached. The hunting of migratory birds by the use or aid of baiting with grain or other artificial food is prohibited.

The shooting of migratory birds earlier than one-half hour before sunrise or later than one-half hour after sunset is prohibited.

The penalty for violation of the migratory bird laws is a fine of not more than three hundred dollars and not less than ten dollars or imprisonment for a term not exceeding six months or both fine and imprisonment.

COUNCIL MEETINGS

First Monday of each month

commencing at 8:00 p. m.

Education to be Still Higher Says Official

In order to clarify just what is happening in Olds in respect to education and where it would all end, the Gazette this week phoned the Deputy Minister of Education at Edmonton and had an interview, mainly with respect to the cutting of the grant here and the fact that we were paying over 50% of our taxes for school purposes.

Mr. W. H. Swift, in replying to the question as to where it would all end, went on to state that we could expect education to become still higher. He said that the reducing of a grant does not, necessarily mean that some other school district will get the benefit. In fact, he intimated that more grants were being received than were being increased throughout the province.

We ventured to suggest that eventually education would have to become a Dominion matter in order to level it out to the best advantage of the ratepayer and he said that was the ultimate hope.

He mentioned that the real cause of the increase in cost of education in the past few years had been the rise in teacher's salaries, justified as it may be, nearly 40% since the war years.

He saw no hope of the situation easing up any, but mentioned that those responsible for education in the province were making efforts to get increased grant monies from some source or other, but as yet nothing had been found.

Mr. Swift was to tell the situation here and said that it was occurring in other places as well and apparently he had no solution for the problem.

From the Olds Gazette

Suspend Licenses of Car Drivers

Forty drivers' licenses have been suspended in Alberta this year for various causes according to information received from the provincial secretary's department by the Alberta Motor Association.

During the whole of last year the number suspended was 68.

Provincial Legislation provides that magistrates have power to suspend drivers' licenses when a conviction has been made for violation of the law and such a course appears desirable in the circumstances.

Margaret Wickerson is relieving at the Teller's wicket at the Bank of Commerce while Maxine Mair is on holidays.

A baseball game will be held on the Fair grounds on Sunday afternoon between the Crossfield and East Community teams. First game starts at 1:30. Come out and support your team.

LOCAL NEWS

A. W. Gordon is away adjusting hall looses in the Drummeheller district.

Garnet O'Neill has not been well of late and is undergoing a medical check-up in Calgary.

Mrs. Art Westworth returned home on Saturday after undergoing an operation in a Calgary hospital.

Miss Alice Hall, Miss Gladys Ruddy and Lorne McCool returned last week after attending summer school at Edmonton.

Rumour has it that Harve McCool has sold his farm and is looking for a suitable chicken ranch in the suburbs of Calgary.

Doc Albrecht is out and around again without his crutches, the result of a recent crash in his leg caused by an engine crank when the tractor he was driving.

Mr. and Mrs. D. J. Hall accompanied by their daughters, the Misses Cora and Alice and Miss Ruth McCool left on Wednesday to spend a few days in Banff.

Nothing complete is the large double garage Everett Bille is building just west of his home.

The driveway in orange and white is most attractive and the building itself is classy. Contractor Carl Becker is doing the work.

Mr. and Mrs. Burt Armstrong returned to their home at Beverly Hills on Tuesday after spending a few days at the home of the latter's sister, Mrs. D. Ontkes and Mr. Ontkes.

Ken Borwick has taken over the management of the Purich and Heimbecker elevator here, and has moved his family into the house recently vacated by the J. H. Reeves family.

The decoration day service sponsored by the Oddfellows and Rebekahs on Sunday last was well attended. A short service by the Lodges was held in the United Church and some fifteen to twenty cars full of people went to the cemetery and placed flowers on a large number of graves.

The hail storm on Tuesday evening did further damage to a strip just north of here. This makes three in a row for a number of farmers in this area and the best of them are feeling the pinch.

MISS AUSTRALIA

Winner of the title of "Miss Australia" at the most beautiful girl in the land of the bays and the bayside, Miss Rhonda Kelly is visiting the Crossfield area. She is shown in a picture of her home, a beautiful place. She will be in the Crossfield area for a short time.

For printing of all Descriptions. See HARRY MAY.

Farm Problems In Britain

MORE THAN A YEAR has passed since the war in Europe ended. At that time there was expectation of an early relaxation of wartime controls, and of other demands which had been made on the people because of the urgent needs of the times. World conditions, however, have been slow to improve, and in the case of food the situation has become increasingly critical. Farmers everywhere are being called upon to help in this emergency, and there has been little relief for them from the pressure of the war years. A recent article published by the British Ministry of Information tells of the ways in which farmers in Britain are being called upon to meet the present food situation. The article says in part: "In wartime the food policy in the United Kingdom aimed to provide an adequate diet as possible for the human population, while restricting to the maximum extent practicable the strain upon merchant shipping tonnage. In carrying out that policy, it was essential that there be full control of supplies at every stage from producer to consumer. Thus the utilization of land, the proportion of grass and tillage, the crops grown, the disposal of crops, purchases of feeding-stuffs, and the marketing and slaughter of livestock were all brought under strict control."

Made To Grow Certain Crops

"Farmers were made to grow wheat, potatoes, sugar beet, and other crops for human consumption to an extent dictated by the nation's needs, and, having grown the crops, farmers were not allowed to use any of them for feeding to livestock, with the exception of portions that were judged by Government agents to be unfit for human consumption. The maximum proportion of tallings and screenings which could be used by the producer was fixed by law. Farmers were not only forbidden to feed to their livestock any crops suitable for human consumption, but were also forbidden to sell either bread grain or fodder to any purchaser other than merchants approved by the Ministry of Food. These sales of fodder grains, together with the oilseed cakes, wheat offals, and other by-products of oilseeds and grain imported for human consumption, constituted a pool out of which supplies were rationed to essential livestock. This resulted in drastic decreases in the quantities of grain available for use by farmers, but it also allowed increased grain supplies for human consumption. With peace came two main relaxations: the abolition of compulsory directions for wheat growing, and an increased allocation of foodstuffs for pigs and poultry. But, now, a year after the end of the war in Europe, Britain has reimposed or is about to reimpose both of these restrictions. Farmers have been released from their obligation to sell all the millable grain and edible potatoes that they grow, and sales of fodder grains still have to be made only to approved buyers, and the total supply can be kept under control and directed to the livestock which it is most desired to maintain in order to maximize food supplies to meet the world food crisis."

Fights Famine With Intensity

In stores, together with the intensity of the rationing, farmers must expect to receive before next harvest, will barely suffice to provide a supply of four and bread comparable to that of wartime, and if arrivals of wheat fall short of expectations, it will be necessary either to reduce consumption, or to increase the rate of extraction, which will necessitate a further cut in rations of feeding stuffs for livestock, and will also lower the food value of the reduced volume of rations. Thus, for the remainder of 1946 and during the production year 1946-1947, the full rigour and intensity of the United Kingdom wartime food programme will be reinstated, in order to secure the maximum possible output of food for humans. Apart from the fact that United Kingdom farmers and farm workers are tired, and that a good deal of their farm machinery needs replacing at a time when dollars cannot be spared to buy new American machines, a good deal of labor has been lost through the repatriation of prisoners of war and the demobilization of many in the Women's Land Army. Notwithstanding these disheartening conditions, it is quite clear that the United Kingdom farmer is going to fight the famine with the same intensity with which he fought the war."

Do you suffer MONTHLY FEMALE PAIN?

This fine medicine is very effective to relieve pain, nervous distress and, etc., "dragged out" feelings, of such days—when due to female functional monthly disturbance. Also fine tonic!

It is a powerful, quick-acting, and quick-acting remedy for itching skin.

GETTING TO IT

Science Making Attempt To Find Cure For Common Cold

At last science has declared war on the common cold.

The test-tube "wizards" have long been fighting their endless feud with cancer, tuberculosis and heart disease, but this is the first time they have attempted an all-out blitz on coughs and sneezes.

The United States National Institute of Health has announced that early in July it will open its campaign to discover prevention and cure for civilization's greatest and most irksome time-waster.

Dr. Rolla, Ryer, institute director, discloses that a research team will be assigned to the program, which will last at least five years. Key researchers will be a medical officer, a research expert specializing in viruses, an epidemiologist and a bio-chemist.

Their first task will be to isolate the cold virus or, if there are a number of different viruses, causing a variety of colds, to isolate each type of virus. When this has been done the researchers will go to work to develop a vaccine which will provide immunity against colds.

For the first year of investigation the researchers have been allotted \$50,000. This sum is negligible when it is realized that in the United States alone colds every day keep 250,000 workers away from their jobs. And if the project is a success the relief in human misery will be incalculable.

By 1950, hazards the Vancouver Province, we may look forward to clearing out the cold remedies from the medicine cabinet. In the meantime we may as well keep our fingers crossed, stay out of drafts and stow a handkerchief in our pocket.—St. Thomas Times-Journal.

May See Mistake

Some Farmers' Sons Returning From Overseas Prefer City Life

We heard, says the St. Mary's Journal-Argus, about a well-to-do elderly farmer, who has been working hard to hold his well-stocked two hundred acres for his two boys who had been interested in farming before going overseas. On their return, the brothers said they were not doing jobs in Windsor. Regrettably, the old gentleman has sold the home place. We wonder how much better these lads will be after they have paid high rent, income tax and numerous city expenses. Hours will be shorter for them, but it takes a well-balanced man to use his spare time wisely. They say that the farmer has only a few dollars left after he has paid his expenses. How many city folk have any cash at all after their year's struggle with the budget?

ON WAY BACK

A house agent had a farm on his books which was supposed to be haunted, and to prove wrong he decided to engage a man to stay there for one night.

The following day he was up early and went around to see how the man had fared. On the lawn he discovered the remains of a window ash and shingles completely wrecked by the watchman there was no sign. Four days later the house agent came across him tramping along a country lane three miles away.

"Hallo, George!" he cried. "Where have you been all this time?"

The man wiped the perspiration from his brow. "Boss," he replied, "I've been coming back."

PIANIST, 15, TO PLAY WITH PHILHARMONIC — Philippa Duke Schuyler, youthful musician, who was 15 on Aug. 2, makes her debut with the Philharmonic Symphony orchestra in New York. Daughter of a Negro journalist, she will be guest pianist in the Saint Saens G-minor concerto. The orchestra will play one of her original compositions during its program.

The Coming Age

Will See More And Varied Products From Plastics

The makers of plastics held an exposition in New York to show how many things they had devised from their products. On display were:

Plastic bugles and trumpets which require no warming up. Also a string orchestra, with all instruments of plastics.

Golf clubs made of molded nylon; a plastic boat; a horse with a plastic saddle. (The horse was of the old-fashioned sort.)

Plastic wallpaper on which Junior can scribble without getting scolded, and a plastic gown which cannot be stained by a spilled cocktail—you just rub it with a damp rag.

A \$30 toy which manufactures on demand little plastic toys, such as buildings, horses, cowboys.—New York Herald Tribune.

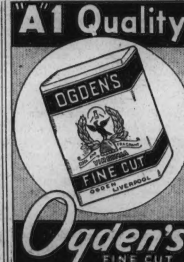

Bravery Bejiggered!

An admiring group surrounded the boy who had plunged into the canal and effected a rescue.

"That was real bravery, my little man," exclaimed a bystander.

"Bravery bejiggered," returned the dripping hero. "He had four of my marbles in his pocket."

We're always hearing about this "good hours", in various disputes. It's a good name, because nothing happens at those hours.

A1 Quality

DODGEN'S

FINE CUT

Dodgen's

FINE CUT

Make this 30-day test!

1. If you're really fit, see your doctor! But if you just feel dull and head-ache, you may only be suffering from incomplete elimination. Especially if you're over 35. Here's how one simple change of diet can help you keep fit!

2. Start now to eat Kellogg's Bran Flakes every morning. If you want to keep feeling fit, the natural way, get more of the "bulk" your system needs by eating delicious, gently-laxative Kellogg's Bran Flakes With Other Parts Of Wheat.

3. Just thirty days should prove to you how grand it is to feel alert, to have the energy for all the extra things you like to do. You want to go on keeping fit the Kellogg way!

Bran Flakes, Pep, Corn Flakes, All-Bran, Rice Krispies, Kreams and All-Wheat are all made by Kellogg's, the greatest name in cereals.

Kellogg's Bran Flakes are delicious. In a recent survey Canadian housewives voted Kellogg's 3 to 1 favourite over any other brand.

SAVE TIME...SAVE FUEL...SAVE FOOD!

Health LEAGUE OF CANADA

TOPICS OF VITAL INTEREST

EYE INFORMATION

Do you know that diseased tonsils and adenoids, diphtheria, mumps, measles, whooping cough, and many of the children's diseases can produce eye infections? A noted Canadian eye specialist is our authority for this and he reveals that some of these infections can be avoided by vaccination, tonsillectomy, toxoid treatment and care in avoiding contact with persons with communicable diseases.

Concerning other eye troubles in early life our authority reports as follows:

Congenital cataract can be avoided only by the prevention of marriage in families with this trouble. Some congenital eye conditions can be avoided by proper diet, the avoidance of infection and the cure of venereal disease before conception. Interstitial keratitis is due to congenital venereal diseases in 95 per cent of cases and five per cent to tubercular diseases.

Small nodules or red patches on the surface of the eye — Phlyctenular Keratitis—are usually of tubercular origin and are largely hereditary in type. The use of pasteurized milk would make this disease rare.

Crossed eyes can be prevented from becoming useless if the whole is provided with glasses if early examination proves they are necessary. For those not requiring glasses, the poor eye will be developed if the good one is covered. In some cases an operation may be necessary.

A turned eye may be blind from a tumor. It may be scarred or the muscles may be unable to hold the eye in the correct position. An eye that is not used loses its vision.

Allergy to a certain food in some cases causes an eye condition. Tests have been made to determine which foods cause the allergy. In the case of hay fever, tests should be made to discover which serum is needed to relieve the condition.

Eye injuries, treated promptly, may prevent sympathetic disease of the eye.

Going on to eye troubles which can be incurred after childhood, our authority advises that industrial workers should always use protective glasses when necessary and should have proper illumination at their work. These precautions will prevent accidents and avoid eye strain.

However, in case of an accident, foreign bodies should be removed as quickly as possible.

Iritis, caused by infected teeth or gums, is much too common, and can be avoided by proper dental care. Sinus and tonsil infections after childhood also affect the eyes. Lack of vitamins in the diet during childhood may show up later as red lids, red watery, irritable eyes and poorer vision. A diet of milk, cheese, and butter, whole wheat bread and citrus fruits may prevent and cure these troubles.

Veneral disease can cause several eye complaints and can lead to blindness. However, the eyes can be saved with prompt treatment.

Blurred vision may be due to glaucoma, or may merely indicate the need of glasses. In case of the former, early treatment is of value. Sometimes an operation is indicated.

Diabetes can lead to formation of cataracts, but early diagnosis of this

disease and proper adherence to diet and insulin treatment frequently checks their formation.

Eye hemorrhages may be caused by high blood pressure or anaemia. Prompt treatment of the cause makes possible the saving of the eyesight.

Muscular paralysis, which causes an eye to turn suddenly out of line or make one see double, may be caused by diabetes, venereal disease, a nervous disorder, brain tumor or hemorrhage. However, prompt treatment generally can prevent or relieve most cases of this type of paralysis.

Styes and pimples on the eyelids may be signs of diabetes or some other internal trouble.

Persian Carpets

Are Products Of Craftsmen Whose Artistry Is Unequaled

The ancient land of Persia, front page news in the papers for so many weeks, has meanwhile been playing another and quieter part in our daily life.

Persian carpets are selling at immense prices in British salerooms. Carpets of any kind are scarce enough to fetch high prices in these days of acute shortage; but Persian carpets are often unique, and their magnificent workmanship has kept them in the forefront throughout the troubled centuries.

Persia taught the "world how to make carpets, with an artistry and craftsmanship never yet equalled. She has not yet persuaded the world to use carpets as Persians do, not merely for decorating the floor of a room, and keeping it warm, but as wall decoration in place of pictures, for sitting and sleeping on, and as tables for high priced meals. All these have long been Persian uses for carpets, and they certainly tend to make life a little simpler.

The older Persian carpets are, the finer they are, and the best of them are almost priceless. Sir Murdoch Smith, a famous antiquary, once said that the carpet of the Shah Abbas, who reigned at the end of the 16th century. If it is there still it is a notable link with a notable past.

Britain Plans To Develop Her Tourist Trade

LONDON.—Great Britain's tourist industry is facing the tremendous task of rehabilitation with confidence and considerable restraint. Because it is a task that will take some time Britain is not inviting a flow of tourist traffic before 1947, and the slogan for the industry now is "Come to Britain next year and not this."

Those who must visit England in 1946 for business or other compelling reasons, and who can get shipping or plane space, will be welcome to the best the country can give. However, only in the spirit of hospitality will this reach pre-war standards. Food and housing accommodations are still on an austerity basis, though somewhat improved over wartime standards.

While British hotel men are rebuilding the 24,000 hotels and licensed houses destroyed or damaged by bombing, and reconciling those buildings requisitioned by the Government and its Allies, they are planning to rebuild as well the spirit and pace and the conveniences with which they catered to visitors. They have become aware mainly through the GI who was stationed here during the war of the potentialities of the tourist traffic. And they have learned from him what pre-war tourists could have told them—that they were not satisfied with old-world plumbing and the slow methods of waiting, chambermaids and hallboys. It is popularly supposed that English cooking will remove any appetite at a glance and that watery Brussels sprouts are the only vegetables cooked here. That is not true, but it was true that too often visitors to England were confronted with meals that did not reflect credit on the cooks. That is one of the things that will be improved in the future.

Britain manufactures excellent beds, but in the past such beds were not found in the majority of hotels. They will be in the future because hoteliers have at last realized that the client who lies uneasy is unlikely to return.

All this is beginning to be understood here and hoteliers have begun together to advertise through the Government-sponsored British Travel Association what they have to offer in the way of accommodations, meals and amenities.

The British Travel Association received nearly 20,000 applications for overseas membership—the bulk of them from the United States and Canada—in response to a recent offer extending honorary membership to service men and women who served in Britain during the war.

FRILLY CLOTHING

British Women May Soon Buy More Attractive Garments

LONDON.—Frills, ruffles, pleats, pockets and buttons will soon bedeck British women's clothing once more, relieving the wartime austerity designs.

It will be autumn or winter before the new goods reach the shops.

Price-controlled utility coats, costumes and frocks will be slightly more expensive due to the extra working hours involved on non-austerity styles. The increase will be approximately 15 per cent. on each garment.

Austerity regulations, first introduced in 1942, limited the number of pleats, buttons and pockets on any one garment, and stopped the use of frills, lace and all kinds of trimming. The object was to save material and labor.

Austerity restrictions have also been lifted from underwear but although it is now slightly gathered and ruffled and trimmed with little bows, manufacturers are unable to make anything extremely elaborate as lace is still unobtainable for the home market.

NEED COAT OF PAINT

Buildings All Over Britain Are Looking Pretty Shabby

Wherever you travel in Britain, one thing strikes the eye immediately: the whole country needs a good coat of paint.

Somewhere, says Basil Dean, in the Vancouver Province, the blistered, pockmarked paintwork of stores and houses, office buildings and railway stations symbolizes the austerity of living which is the dominant factor and the main topic of conversation.

Paint was drafted during the war. It is in process of being demobilized now—you can buy glossy paint in a limited number of shades in most stores. But the painters were called up, too, and they are now being demobilized as quickly. Those who are out of uniform have all been directed into new building projects, and it is still almost impossible to get small redecorating work done.

WASTE PAPER WASTED

BRISTOL, Eng.—Britain burns 100,000 tons of waste paper a year, while Finland and Sweden are asked to send waste paper to Britain, said J. C. Davies, Board of Trade Director of Salvage, here recently.

World News In Pictures

AIRMAN KILLED—Death of a hero son has been revealed to the mother of Flying Officer Roy Foster, of Burlington, Ont., by letters from Holland. The youthful airman was captured and then shot by the German gestapo after his plane was downed.

FLEDGLING LAWYERS WERE WAR PRISONERS—Graduates at Osgoode Hall law school, Toronto, included these three former prisoners-of-war who spent considerable time in German hands. Left to right, James Russell Turnbull, William Walter Cameron and Robert Wright Davies. Turnbull passed exams while in prison camp.

\$150,000 SPIDER BITE—Publicity stunt by Hal Roach to boost a recent movie backfired when shaggy Beverly Loyd, posing with four black widow spiders, claims one of the animals bit her. Now Beverly is suing Roach, for \$150,000.

ONE HAND, NO LEGS, SOLDIER DRIVES CAR—Exploding German bombs cost Edward J. Wilkie, of the Essex Scottish Regiment, his right hand and both legs. Now owner of an acre of land just outside Kitchener, Ont., he recently planted six bags of potatoes. Today he is driving his car, walking and working in his garden. Last November, one year after he was wounded, he married Helen Wendell. Wilkie is shown seated in his car while his wife looks on.

TAXIMAN PLAYS LUCKY HUNCH—Taxi-driver Harry Halpern, Toronto, took a suspicious "fare" on a hunch, to police station. Searching back seat, police found this rock, "possibly to knock my brains out with," sighed Halpern, afterward. "Fare" booked on attempted robbery.

SEEKS CONGRESS SEAT—Mrs. Martha Sharp, housewife of Wellesley, Mass., won the Democratic nomination for congress in the 14th district of Massachusetts. She will oppose Republican Minority Leader Joseph W. Martin in November election.

DEPUTY-FUEHRER'S STENO

Fraulent Elise Kreuger, former secretary to deputy-fuehrer Martin Bormann, has told Allied authorities she is convinced that her boss is dead. She said he was "too stupid" to have remained in hiding successfully for so long. She now works as a clerk in Hamburg.

BUSH FLYER SAVED—Dash pilot O. F. Kingdon, of Kapuskasing, Ont., narrowly escaped death when he was forced to crash his Ontario forestry plane in Twin lakes near Nakina. Kingdon had just taken off when a terrific cross-wind made him lose control. He swam to shore from the wrecked plane.

STILL HAS VISITORS

But League Of Nations Buildings In Geneva Are Deserted

GENEVA.—The League of Nations first great experiment in international unity, has come down to \$10,000,000 worth of empty buildings stricken by a lone, vain-glories peace.

This white, deserted village, where the initial bid for world peace faltered, once was a beautiful farm on the edge of Lake Geneva's shimmering waters.

On this farm dozens of peacocks walked in spread-tailed wonder as men built a whitestoned citadel of peace and co-operation in the pleasant pastures.

The peacocks gawked from green hedges as famous men from many lands met to bargain and labor.

One by one, the peacocks died. Now only silence is left. The symbol of defeat which these empty halls represent means nothing to this peacock but it does call to others who walk through this former world capital and think of all the graves filled by its failure.

Before the Second Great War began, thousands of tourists flocked daily through these vast chambers and colorful gardens. Some 300 visitors daily still walk along the empty corridors, but it is as if they trod some old mausoleum.

The rubberized floors are still slick and shiny now. Little dust has collected in the hundreds of offices and ornate committee rooms. With \$2,500,000 spent yearly for upkeep during the war years it was no difficult problem to keep the league's home clean.

U.N. Is Moving To Site Of N.Y. Fair Grounds

NEW YORK.—The business of molding the world of tomorrow will be transferred to the original site of "the World of Tomorrow"—the old world's fair grounds—when the United Nations general assembly moves to its interim home in Flushing Meadows Park in September.

On a portion of the 1,200-acre tract where 45,000,000 sightseers gaped at the wondrous things to come, delegates from the 51 United Nations will be striving for a peaceful world to put them in. At the moment, all that's left of the wonder is an overgrown wasteland of tangled shrubs and bushes covering the former gay, fluorescent-lit fairgrounds.

The U.N. area centres around the New York City Building, filled with municipal exhibits during the fair, and later turned into two mammoth ice and roller skating rinks.

From the foot of the building delegates will look down what used to be the fountain-lined Constitution Mall, and straight over to the spot where millions marvelled at the nightly fire and waterworks displays in the Lagoon of Nations. The Court of Peace, with its impressive intersecting colored searchlights, is no more, and the League of Nations Building, as well as the others, has been torn down.

Some 300 workmen are getting the City Building and a surrounding area, about 1,200 feet in radius, in shape for the U.N.

Symbolically, the ground now being smoothed from tangled grass to velvet-smooth lawns and flower beds includes the "time capsule" buried during the fair to give future generations an idea of what we were like.

The U.N. will meet just a few hundred yards from the spot where 10,000,000-volt electric lightning flashes were produced for the awe of fairgoers, and within the vicinity that boasted such wondrous sights as television demonstrations, the robot which spoke under the aegis of the telephone company, and the men with apparently bottomless lungs who produced vases and other vessels from molten glass.

New York's building and the surrounding grounds are being furnished by the city at a cost of more than \$1,000,000, and the U.N. is spending more than \$300,000 on equipment. Biggest job facing the contracting company is converting the erstwhile skating rink into an auditorium which will seat more than 2,000. The 420,200-foot building, now dotted with sawhorses, wheelbarrows and gray-clad workmen, is being divided in the middle. The ice skating side is being built to floor level with what the workmen call "shredded wheat" blocks and concrete, and will accommodate committee rooms, a lounge, cloakrooms and a foyer. The roller rink is being covered and converted into the assembly hall proper. It will be flanked with movies, television and radio.

"REMEMBRANCE DAY"

Will Be Observed In Britain On Nov. 10 This Year

LONDON.—Prime Minister Attlee told the House of Commons that Sunday, Nov. 10, will be observed this year as "Remembrance Day" for the dead of both Great Wars. The King will conduct an unveiling ceremony at the Cenotaph in Whitehall.

Mr. Attlee said it had been agreed that the Sunday before Nov. 11 each year should be known as Remembrance Sunday. However, in case Nov. 11 or 12 fell on Sunday, then that date would be Remembrance Sunday.

The dates "1939-1945" would be added to the Cenotaph, which now bears the dates only of the First Great War.

On Remembrance Sunday there would in the future be a national observance at 11 a.m. at the Cenotaph, with the traditional two minutes' silence. Hitherto this ceremony has always taken place on Nov. 11—the date of the 1918 Armistice, regardless of on what day of the week it fell.

Plans Have Been Made for Canada's Post-War Army To Ensure Our Future Security

THE following is the text of a speech prepared by a senior military officer on the post-war Canadian Army. The Government has announced that Canada will maintain her Defence Forces during this period of peace. We felt that most business men have had little time to study the press releases about the plans for Canada's post-war defence forces, and that a short comprehensive talk might help to clarify the situation. With this in mind, we have arranged a series of lectures to businessmen's organizations throughout the prairie command, and this is one of those lectures.

Since I am not qualified to speak about the Navy and Air Force, I am going to tell you about the post-war Army only, with particular reference to the future plans for the unit's in your community.

In order to provide the background for the plans for the post-war army, first, let me tell you something about the army as it was in pre-war days. There are relatively few people in Canada who fully realize the difficult days which our pre-war permanent force and the Non-Permanent Active Militia encountered during the days of peace between the two great wars. Some people in this audience may remember however, the NPAM drilling with wooden guns, and having a squad of four or six men represented on the ground by two men, each holding on to the end of a long rope. Some may remember also NPAM soldiers bringing their uniforms on parade, wrapped in a brown paper parcel, changing into uniform for parade and back into civilian clothes before they went home. It is a shameful thing to say, but in many towns NPAM soldiers were scoffed at and ridiculed by the general public for being in uniform at all, so that they did not wish to be seen in the King's uniform.

In spite of the stumbling blocks placed before these soldiers by an apathetic public, they did carry out a marvelous job. They continued to prepare themselves for the defence of their country, and finally in Sept. 1939, when we found ourselves at war, there was a small nucleus of partially trained men in every community throughout the country. It was around these NPAM nuclei, that the units of our magnificent Canadian Army were built. The spirit and endurance of these men in the NPAM deserve great praise from all Canadians, and we should be thankful that there were some men in Canada who were far-seeing enough to realize that there was a possibility, and that trained troops would be required in the future.

In spite of their magnificent effort, the personnel of the NPAM were at best only partially trained in Sept. 1939. They had been lacking in modern equipment, units were well below war strength in personnel, and the paltry financial allotment was not in any way sufficient. Barring the operations at Dieppe in 1942, it was not until July, 1943, that a complete formation of the First Canadian Army went into the field in battle. Three or four years is a long period of time to allow a country to organize and train its fighting formations. It is strange that a progressive country like ours should have allowed itself to sink into such a pacific state to be totally unprepared for a major war, as we were

Enduring Beauty

To obtain this pattern send twenty cents in stamps (cannot be accepted) to Housatonic Art and Sewing, Winnipeg Newspaper Union, Man. Be sure to write plainly your Name, Address and Postal Number.

In 1939. We were extremely lucky that other parts of the British Empire had some trained troops available, which could provide the defence whilst we were organizing and training in Canada and the United Kingdom. If it had not been for the troops of other countries, perhaps the final outcome of this last war would not have been favourable to the allies. I am not intending to make a war-like speech, nor do I propose to intimate that a World War III is in the offing. It would be ridiculous to make such predictions. I am saying, however, that Canada should be prepared in a military sense for possible emergencies. I suppose that it is possible that in some distant day the world will become so civilized that nations will not have to resort to force to secure peace. That day is not yet at hand; so, in the meantime, it is necessary for us to be ready to act immediately in support of a peaceful settlement, if and when

may become necessary. As a democratic nation, we are naturally more concerned with the peaceful settlement of disputes than with settlement by force, but it is incumbent on us to be ready in a military sense to defeat sudden attempts by nations to settle their grievances by aggressive action. To ensure that we are, in fact, prepared in a military sense, we must maintain in Canada a military organization in which all key and essential personnel are well trained in the latest military doctrine and weapons and which is capable of expansion at short notice.

If we are not convinced that it is necessary for us to maintain an army during the peace period, the next question for us to decide is whether it is necessary for us to have large numbers of ground forces in our post-war army. Let us examine the problem in detail. It is an old established principle of war that the possession of troops. That is, a so-called atomic age, but atomic bombs and other nuclear weapons are only the means toward an end. They are used to soften up defences and disrupt communications and to pave the way for ground forces who are going to occupy the ground. In defence, we might use the example of your local city or town, and say that if an aggressor nation wished to capture that particular city or town, that nation could be subject to a powerful bombardment of high explosive weapons. Our defensive forces would be scattered, and communications would be disrupted, but the city or town would remain intact. We would then be forced out by ground troops of the aggressor nation.

Have I persuaded you now that we need ground forces in our army even in this atomic age? If I have, the next question for us to discuss is how should our army be composed. Military forces cost money; naturally they cost more in war time than they do in peace time and we must realize they send in sizeable bills too. It is we taxpayers who must foot the bills for our army. If we cannot immediately justify this expense, we might be more inclined to do so if we considered our defence forces as Canada's National Insurance Policy for our Security. The premium for this policy in the shape of a small proportion of our taxes is amazingly low for the coverage which the policy gives us.

Since we are paying for the upkeep of the army, we must insist that it is worth the money that we are putting into it. The army must be efficient in all respects and must be composed of young energetic soldiers who are putting a full effort into the service of their country. The government has issued a statement concerning Canada's post-war army. They have outlined a policy which envisages a relatively small Active Force (employed on a full time basis), and a large Reserve Force of part time civilian soldiers. There is only one Canadian army with two branches, one the active force and one the reserve force.

Service in the army will be on an entirely voluntary basis. The very highest calibre of young Canadians will be admitted into the army. The Active Force educational requirements for officers has been set at a university degree, and for other ranks it is junior matriculation. Their army will be streamlined to take its place in modern times. There is an abundance of first class equipment which has been left over after the last war, and which is still the latest thing. This equipment will be issued to units of both active and re-

CRAWL STROKE FROWNED UPON IN SWIMMING — Swimming champions like Marian and Virginia Hopkins, holders of 29 world and national titles, show that beauty and physical fitness go hand-in-hand with the sport of swimming. Beach scenes like this are duplicated throughout the country as Canadians flock to waterfronts to escape the heat, get some valuable tan and generally enjoy the water. The crawl stroke is declared to be an open invitation to sinus trouble, with bacteria driven back into the submerged internal ear and nose passages.

serve forces on a liberal scale, and further than that, continued research and development into new fields of weapons and equipment will be made.

As new weapons and equipment are constructed, tested, and proven sound, they will be issued to units to replace that which they hold. . . . As I mentioned before, the Active Force is to be relatively small. Actually it is proposed to maintain an active force of 25,000 personnel, which is a large increase over the pre-war 5,000. The active force will be composed of the various headquarters establishments, training establishments, and maintenance units, but the main striking force of the active force will be a brigade group of between 5,000 and 6,000 personnel.

As before, the Reserve Force will be the predominant portion of the Canadian Army, and should we be forced to again mobilize, we will have to rely on these citizen soldiers all across the country. The Reserve Force will be large—it is intended to recruit 180,000 part-time civilian soldiers in the various units which have been localized in every major centre across Canada.

A word about Prairie Command. Prairie Command is one of the five new commands established across Canada. It comprises Military Districts 10 and 12, that is, Western Ontario, Manitoba and Saskatchewan. Its command headquarters is a small, operational headquarters and is located in Winnipeg. Military Districts continue to have their headquarters located in Winnipeg and Regina.

ELECTRICITY PARIS ROAD

PARIS—Work has begun on electrifying 320 miles of railroad line from Paris to Lyons, at a cost of \$25,000,000.

The Intriguing Story Of A Fabulously Rich Gold Mine For Which Miners Sought In vain

(From an article by Senator D. R. Riley Of High River, Alberta, in the Alberta Palladium Quarterly)

THERE is a fascination in stories of lost mines and lost men. There is the famed McLeod Mine somewhere in the heart of the arctic north, for which men have searched for 40 years only to have it elude them and leave a trail of bleached wolf-gnawed skeletons behind. And then there is the famed Lost Lemon Mine of Southern Alberta for which prospectors have sought through the years in vain.

In the Spring of 1870 a party of prospectors left Tobacco Plains in Montana to prospect the North Saskatchewan River for gold. Among them were two men, known as Black Jack and Lemon. Black Jack had the reputation of being the best prospector in the West since he was the first discoverer of the Caribou diggings in British Columbia. These two men were staked by Lafayette French, an old-time Indian trader and buffalo hunter.

Leaving the Saskatchewan party they decided to travel south with a large half-breed band headed by La Nouse which would afford them protection against hostile Blackfeet. Finally the parties split, the two prospectors following an old Indian lodge-pole trail up High River towards Tobacco Plains while La Nouse headed for Stand Off. As they prospected, Black Jack and Lemon found likely showings of gold in the river. Following the mountain stream towards the headwater they discovered themselves in the grass roots to a bedrock. They sank two pits and in bringing their cayuses in from the picket line they accidentally discovered the ledge from which the gold came.

Traders who saw samples of this rock at Fort Benton described it as resembling a body of solid gold with a little rock shot into it. It was indescribably rich!

In camp that night the two prospectors got into an angry argument as to whether they should stake the find and return in the Spring or camp right there, which almost led to blows. After they had rolled themselves in their blankets, Lemon stealthily crawled out, seized an axe and split the head of his sleeping partner.

Overwhelmed with panic, when the realization of the enormity of his crime penetrated his befuddled brain, Lemon would have fled the spot, but he was afraid to leave his daylight. Instead, he built a huge fire and with his gun beneath his arm stood to await the dawn. He thought that two men, Black Jack and Lemon, had witnessed the entire tragedy from the cover of the surrounding woods. Two young Stoney braves, William and Daniel Brendow, had trailed the pair, had watched them sink the holes and seen the discovery of the gold.

With the first streak of dawn Lemon mounted his cayuse and hit the trail across the mountains. Meanwhile the two Stoney rangers, saddled the camp, took the two remaining cayuses and set out for the Stoney village at Morley where they reported all they had seen to Chief Bearspaw. Fearful lest the whites hear of the goldstrike and over-run their game-filled hunting grounds, the chief swore the young men to everlasting secrecy.

Since that day many attempts have been made to bribe them for prospecting in search of the Lost Lemon Mine. Bands of horses, herds of cattle, small fortunes to these deserters in the plains, have been offered, but they have never let their tongues remain slack.

When Lemon arrived at Tobacco Plains he confessed his crime to the priest, an old friend of his. He had with him the gold they had found on the day of the killing, as well as a sample of the rock they had discovered; but he seemed perturbed by the recollection of his crime.

Promptly the priest called a half-breed mountain-man named John McDougall, to the scene of the tragedy. McDougall found the spot, buried Black Jack, reared a mound of stones over the grave to keep off prowling wolves, and returned to Tobacco Plains. No sooner had he left than Bearspaw's braves tore down the mound of stones, scattered them piecemeal and obliterated the trace of murder. How well they did their work is indicated by the fact that through succeeding years, the secret has remained so well hidden that the spot has yet to be re-discovered.

All that Winter Lemon remained with the priest, on the borderline of insanity. Meanwhile word of the rich find had spread far afield, and as soon as it was possible to travel in the Spring a large party of miners, guided by Lemon, set out to re-locate the mine.

But fate was against them. Though Lemon scoured the gulches and hillsides he declared he was unable to locate the spot, only to be accused by the angry miners of deliberately misleading them. In the heated quarrel that ensued, Lemon, threatened with death by the hands of the angry men, suddenly became violently insane. He went to his brother's ranch in Texas where he lived many years

having lucid intervals, but never fully recovering his reason.

Next year the priest outfitted a party from Tobacco Plains. The leader was to be the John McDougall who had buried Black Jack. McDougall, who was over at Fort Benton, was to meet the rest of the party at Crow's Nest Lake, and they were to proceed north from there. McDougall left Fort Benton to keep his appointment, but at Fort Kipp, a notorious whiskey-pot, he drank himself to death.

The following year still another party was equipped and reached the lake where mountain fires burned all the grass and timber forcing them to again abandon the enterprise. Next Spring the priest sent out a smaller party under the guidance of Lemon. But proximity to the place of tragic memory again unsettled the man's addled mind, and the party was forced to take him back.

Lafayette French arrived at Tobacco Plains again, ostensibly to unlock the secret of the hoard of hidden gold. In the vastness of the hills he was overtaken by a strange sickness and dragged himself back to Tobacco Plains more dead than alive. Some strange hoodoo seemed to haunt all those who sought the lost mine.

For the next 15 years Lafayette French continued to devote himself unswervingly to his self-imposed task.

The hoodoo, that had haunted French continued to dog his footsteps to the very last. In a fire of mysterious origin that destroyed the Emerson House on the night of his death, French was terribly burned. On the same evening, he had written a letter to a friend at Fort Benton and posted it at the Bar U Ranch. Evidently it was written in a state of exaltation and excitement. He had at last, he said, located it and was coming to the River in a couple of days to tell him everything and enlist his help.

When he arrived he was unable to talk before he died, but he had actually solved the problem which had occupied so many years of his life, the secret died with him.

Numerous attempts have been made since that time to relocate the mine, the most notable one as recently as 1928. Many there are who say that nothing will be found east of the mountains, but geologists designate a tract of land between Crow's Nest Lake and Mist Mountain, on the headwaters of the Highwood river, as a disturbed area in which precious metals might be discovered.

If one were to believe the stories that have come down from the early days, the search for this hidden Eldorado has claimed more than Black Jack's life. There is the story of a white man's skeleton found in the gap of the Old Man River, the bones fingers still clutching a bag of gold. There is the story of two men, both badly wounded, stopping one night in the 90's at a ranch in the foothills. They carried gold dust and were feeding from a West. They rode away next morning for Fort McLeod, but never arrived. Had they rediscovered the lost Lemon Mine only to be followed and killed by Indians?

Jet Engine Speedboat

Sir Malcolm Campbell To Use New Design In An Attempt To Break Record

LONDON.—Sir Malcolm Campbell said that he will use a jet engine in an attempt next autumn to smash his own world speedboat record. Sir Malcolm set the record at 141 miles per hour in August, 1939.

Sir Malcolm said a jet engine never before has been fitted to a boat, and that "exhaustive tests" now are being carried out in a tank and wind tunnel, "aerodynamics play a very big part in the speeds we hope to reach," he explained.

ONE HOOK; TWO FISH
TACOMA, Wash.—This is Bob Fison's fish story. A new two-fish hook threatening about in shallow water. He dipped his hook beneath one; snagged it by the jaw, and when he jerked it up, another fish came out, too; caught in the mouth of the first.

BACK IN HOCKEY MAJORS
Philadelphia will join the American Hockey League next season, making it a nine-team circuit. At the annual meeting at New York, the Redol of New Haven, Conn., was re-elected president.

RECORD SHOWS THAT CANADIAN PRIME MINISTERS LIVE LONG

With One Exception, All Have Died Over The Age Of Seventy

The fact that Mr. Mackenzie King passed even the long record in office of Sir John A. Macdonald serves to remind Canadians that their Prime Minister is no longer young. But it should also remind them of the fact that being Prime Minister of Canada seems to prolong the life rather than to abridge it. Canadian Prime Ministers have a custom of dying full of years.

The record shows that Canada has had eleven Prime Ministers since Confederation. It is true that some held office for only brief periods. Yet all were men who had been subjected through many years to the strains of public life. It appears that, with only a single exception, all Canadian Prime Ministers have died over the age of seventy. The single exception is Sir John Thompson, who, at the age of 50, dropped dead in Windsor Castle a few minutes after having been made a Privy Councillor.

The comparatively early end of Sir John Thompson seems to emphasize the longevity of his predecessors and successors. For of the other seven Prime Ministers who are now dead, four died in their seventies, one in his eighties, and two in their nineties. Two former Prime Ministers are living—both in their seventies.

Even eminent medical authorities, who have shaken obvious heads over the expectancy of Prime Ministers, have themselves lived to be surprised. If not abashed, Sir William Osler once pronounced Sir Charles Tupper to be a very sick man. Some twenty years later, while attending a ceremony at the Cathedral at Antwerp, someone tapped him on the shoulder. On turning around, he saw Sir Charles, who smiled sweetly and said, "Not dead yet!" That was in 1901, when Sir Charles was 80. He lived to die in 1915, when in his 95th year.

If the record of Canadian Prime Ministers is placed beside that of the Presidents of the United States, the comparison is definitely favorable to Canada. Since the Civil War (a period approximately equal to that of the Dominion of Canada) the average age of the Presidents has been only 62 1/2 years.

There is contrast in another particular. For three Presidents have lost their lives through assassination, whereas no Canadian Prime Minister has yet had the opportunity to fall a blessed martyr.

There must be some explanation for the longevity of those who head Canada's governmental system. Perhaps, as the Gazette suggests, it is the pure air on Parliament Hill. Or perhaps it is the essential tranquillity of the Canadian political scene—Montreal Gazette.

Fashions

A really lightweight woollen smartly tailored is a good prescription for a summer suit, one that is nice on cooler days for commuting to town, and good for long distance travel, too. Navy with white stripes used horizontally as well as vertically, is used for this nice suit that is figure-kind. There are vertical insets for the yoke effect. A self tie closes at the waist. The skirt is slim and straight and the back of the jacket is slightly bloused.

RIVAL PREACHER WINS
GALESBURG, Kans. — The Rev. Leonard F. Murphy of the Christian Church offered a prize to the person bringing the most neighbors to an evening service. The Rev. Robert Alexander, Methodist minister, won the prize. He dismissed his church and led his entire congregation over to the Christian Church.

Pottery making is one of the oldest forms of human industry. 2684

Forced Out Of Blazing Building, Farmer Is Charged With Murder

When a sheriff and his brother Frank Morris were killed by gunfire, John Morris, Cambridge, Ill., farmer, refused to surrender. Here a policeman fires at farmhouse where he took refuge.

As the afternoon gun battle continued, fire broke out at the rear of the farmhouse owned by Frank Morris. Later charged with his murder and that of Sheriff Byron Pierce, John Morris fought off police. Routed from the burning farmhouse, he was taken to jail by Illinois state police.

Lightning Casualties

Anywhere Indoors Is Better Than In The Open

The chance of not being struck by lightning is approximately 365,000 to 1, says Dr. G. D. McCann, Westinghouse engineer whose specialty is lightning. Safety Council figures show that the chances against your being fatally injured in an accident in your home are only about 4,900 to 1, and in an auto accident only 3,600 to 1. About 400 persons will probably be killed by lightning this year, about 35,000 in household accidents and about 40,000 on the nation's highways.

Most lightning casualties occur in small towns and rural communities, according to Dr. McCann. The city dweller is relatively safe, chiefly because he seldom has far to go to reach shelter. Besides, the shelter is bigger and safer. Because steel skeletons of skyscrapers serve as electrical conductors, tall buildings of a city afford almost complete protection.

The ordinary city dwelling is a pretty good haven. Thunderbolts strike hundreds of such buildings and homes every year, but the tops and sides shed the lightning into the ground. The structure is undamaged and the occupants are unaware that anything has happened.

Almost anywhere indoors is preferable to being out in the open when a storm is raging.

Service Restricted

How One Postmaster Dealt With Circulars For Deceased People
TORONTO.—One rural delegate told the Canadian Postmasters' Association annual meeting how he solved the problem of certain companies sending out circulars to long-dead clients.

"The first couple of times the letters arrived," he said, "I returned them in the regular manner. The third time they came I made a list of the company's deceased clients and sent it back with a note which said: 'If you have a traveller who has gone into the great beyond send him the list. Our department doesn't go that far.'"

A cayman is a species of alligator.

Auto Tourists

Inquiries For Trip Data And Maps Per Exceed Early Estimates

A host of automobile tourists are already coursing over the highways and the migration will continue until the snow flies, according to estimates by motoring and travel agencies. Inquiries for trip data and maps already have mounted to totals that dwarf estimates made earlier in the year, and the end is not in sight.

Eagerness to take to the open road has swept in a wave over the nation. Long trips are the order of the day and there are indications that motor tourist travel for 1946 will exceed the peak year.

A vast number of cars are definitely in the over-age class. And therein lies one of the most important problems which confronts the operator who wishes to have a holiday unmolested by accidents.

A prime requisite to the enjoyment of a carefree trip is to have the vehicle thoroughly checked before starting. When in doubt consult the mechanic is an excellent axiom, as often it is the hidden unexpected flaws which cause sudden breakdowns. Rid the machinery of malicious "gremlins" and you cast aside a big cargo of potential troubles.

With the "gremlins" out of the way, the rules of careful driving should be learned by heart and adhered to always. Included in the curriculum of the road is a thorough knowledge of speed limits in the localities that he along selected routes. This can be acquired by diligent inquiry while enroute.

BETTER ODDS

A bookmaker who was ill sent his small son for the family doctor, but it was a strange physician who called.

After the doctor had left, he asked his son for an explanation.

"Well, you see, dad," said his son, "there were lots of brass plates on the doors, and when I got to the number you gave me, I saw 'Consultations 10 to 11,' but the chap next door was offering 'Consultations 10 to 1,' and I thought you'd like the one that gave the best odds."

The University of Paris was the model for Oxford and Cambridge.

Auto Tourists

Inquiries For Trip Data And Maps Per Exceed Early Estimates

A host of automobile tourists are already coursing over the highways and the migration will continue until the snow flies, according to estimates by motoring and travel agencies. Inquiries for trip data and maps already have mounted to totals that dwarf estimates made earlier in the year, and the end is not in sight.

Eagerness to take to the open road has swept in a wave over the nation. Long trips are the order of the day and there are indications that motor tourist travel for 1946 will exceed the peak year.

A vast number of cars are definitely in the over-age class. And therein lies one of the most important problems which confronts the operator who wishes to have a holiday unmolested by accidents.

A prime requisite to the enjoyment of a carefree trip is to have the vehicle thoroughly checked before starting. When in doubt consult the mechanic is an excellent axiom, as often it is the hidden unexpected flaws which cause sudden breakdowns. MUSCLE-BUILDING MACHINE MADE FROM AIRPLANE TUBING

Has Revolutionized The Concept Of Rebuilding Any Of The Larger Groups Of Muscles

A new, improved version of the Delorme muscle-building apparatus, which since its development in 1942 has revolutionized the concept of rebuilding any of the larger groups of muscles, has been constructed at the Ottawa Veterans' Health and Occupational Centre, Billings Bridge.

The apparatus, built at the Department of Veterans Affairs Institution by Norman MacLaren and Bud Warren of its training staff, is a king-size gadget of stainless steel airplane tubing which can easily be lifted by two men and may be completely dismantled in a couple of minutes.

The apparatus is particularly adapted to rebuilding leg and back muscles. Previously physicians achieved this end by prescribing cycling, lifting small weights, etc.—a high number of repetitions against a low resistance. This was a lengthy process which tended to develop endurance rather than power.

Captain Delorme of the United States Army Medical Corps, who had been a keen student of weightlifting before he studied medicine, conceived the idea of getting power before endurance. He felt this could be done by training patients with weights—really heavy ones—and developed his own apparatus, designed to exercise muscles slowly against a high resistance. By scientifically controlling the application he achieved faster and more extensive results than other methods produced.

The first of these muscle-building structures to make its appearance in Canada was built by the Royal Canadian Engineers for the Montreal Military Hospital. Although it produced outstanding results, it was a somewhat cumbersome outfit of wood and ordinary pipes. Once set up it was a permanent fixture, for it was not readily dismountable and required several men to move it at all.

Egyptian astronomers had advanced so far they were able to devise a calendar of 365 days 6,000 years ago.

The expression "between the devil and the deep blue sea" originated in 1637 when a Scottish regiment was trapped between the ocean and Swedish artillery fire.

To Feed Right — Eat Right!

Man Buried In Cave-In Saved By Brother And Fellow-Workmen

The life of David Amis was saved by fellow-workmen when he was buried in this cave-in of a nine-foot deep road excavation on Norway Ave., Toronto.

Amis was completely buried in the cave-in when the men went to his rescue with shovels. Front row, left to right, are: Gene Kowalski, Amis, the rescued man; his brother, Bill, and Albert Toose; back: John Mowry, Lyle Franklin and Charles Mullins.

WORLD HAPPENINGS
BRIEFLY TOLD

Airplanes will be used to take 3,500 homing pigeons from Britain to Bordeaux for the first cross-channel pigeon race since 1939.

Workmen clearing out an ornamental pond at Watford, Eng., found a live hand grenade, a Bren-gun machine, bullets—and money.

The last working windmill in Kent, England, known as "The Little Old Widow of Dece," which has operated for 50 years, is to be destroyed.

At the time of his death, Booth Tarkington had a new novel two-thirds completed. His widow is undecided about disposition of the manuscript.

W. A. Dickinson of Leicester, England, has invented a process of making fire-proof bricks from a fine ash waste product from electricity power stations.

John L. Baird, 58, known in England as the "father of television," died in his sleep from what his physician called a complete physical breakdown following influenza.

DERBY, England—The long-established custom of distributing free loaves at Derby Cathedral on Sundays has been discontinued owing to the bread shortage.

A new company, Remind Me, Ltd., is all set to remind forgetful Britons of the things they ought to remember. It was founded by a man who forgot his wife's birthday.

Seventy-five per cent. of the readers of the Berlin Nacht Express would emigrate from Germany if given the chance, a referendum conducted by the paper among its readers indicated.

Effective Control

Says International Control Of Atom Bombs Is Necessary

All of the major and most of the smaller nations of the world will have 500 atom bombs each—enough to blow up every city in the United States of over 50,000 population—within seven years unless an effective international control of atomic energy is set up soon.

"Effective control" means an international authority with "absolute power" within its own limits over every national government in the world.

These were the messages of Dr. Harrison Brown, University of Chicago, chemistry professor and assistant chemistry director of the Oak Ridge, Tenn., atom bomb project, who addressed a Rotary club luncheon in Minneapolis recently.

While the United States still knows more about atom bomb manufacturing than any other nation, "we know that all the other major nations are going full blast" for their atomic work, Dr. Brown said.

"Any nation has enough uranium to make enough bombs to blow up the United States if they dig hard enough. They know that it can be done and they know what material to use, so they can cut the expense of developing it to 10 per cent. of one hundred-and-fiftieth of what it costs."

Unless a potent international control authority is set up and operating within a year and one-half, its establishment will be next to impossible, Dr. Brown predicted, because by then many nations will be making bombs.

Naturalist Dead

Man Who Claims Discovery Of Sea Lion Wants Credit

LONDON—The man who claimed to have discovered that a sea lion could balance a ball on its nose wants credit on his tombstone, his will revealed.

The naturalist, who died in December, asked that his epitaph be "Joseph Woodward, F.Z.S., naturalist, discoverer of latent equilibrium powers given to sea lion species. No one talked in those days of men having powers they could not control. Mere things were a great deal less important. It must have been a long time ago.—Toronto Globe and Mail.

A Long Time Ago

Life Was Simpler And Mankind Is Happier For It

Fundamentally, mankind is homesick. Away down deep, so deep it is a primal memory, rather than any sort of forgotten teaching of childhood, it can recall a different sort of life. It was a simple life, unbeset by international problems, crucial strikes, burdensome taxes. No one talked in those days of men having powers they could not control. Mere things were a great deal less important. It must have been a long time ago.—Toronto Globe and Mail.

NOT WORTH WHILE

The hooker had sounded for dinner. The foreman noticed how quickly one of the men, a notoriously lazy fellow, put down his pick. "I believe," he said sarcastically, "that if the hooker sounded when you had your pick in the air you would leave it there."

"If it got as near to the time as that," replied the man, "I wouldn't trouble to lift it up."

DUO-CONTROL INSTRUCTION CAR—A car with dual control is the idea of Robert McKinley, right, of Vancouver, to teach prospective drivers. The student can operate brake, clutch, accelerator and steering simultaneously, but the instructor has over-riding controls.

Funny and
Otherwise

Just Nowhere

The circus and fun fair was visiting a small American town, and one old man had taken a fancy to the roundabouts.

Round and round he went never seeming to tire, until all his money was gone. Then only did he dismount to refresh his wife, who had been watching him with impatient eyes.

"Well, John," she said, "you sure have spent your money and had a good ride. But where you been, where you been?"

Request Granted

The manager of a tour company wired to the proprietor of a theatre in a small town where his company was to appear: "Want to hold rehearsal at your theatre tomorrow afternoon, three o'clock. Have stage manager, stage carpenter, property man, chief electrician and all stage hands present promptly at that hour."

Shortly after he received the following reply: "All right. He will be there!"

His View

Two farmers of the old school stood at the corner of a street in a large town the other day when a lady passed by dressed in the height of fashion.

"There, John," said one, "what's think of that, lad, eh?"

John eyed her for a full minute, and then said: "Ay, Will, it's had ground that takes so much treading."

Sound Better

A valuable bit of counsel was addressing the jury in a "running-down" case. "Gentlemen," he said, "this accident to my client's little 'orse will ruin 'im! The plaintiff's all is in 'is little 'orse!"

The judge, upon whose sensitive ear these constant and unimagined allusions had grated, could restrain himself no longer.

"Don't you think, Mr. Blank," he interjected, "that at this stage of the case we might refer to it as a pony?"

Who's Guilty?

The vicar was addressing a mother's meeting.

"It has come to my knowledge," he said, "that a woman who is sitting among you today is not carrying out her duties as a wife should do. Instead of preparing a meal for her husband on his return from a hard day's work, she spends her time gossiping. The consequences are that her husband spends most of his evenings in the local pub. Sooner or later this will lead to domestic strife. So that you will know to whom I refer, I will throw this book at her."

They all ducked.

Not Him

The office boy was asked to ring up a number and get the wrong one.

"Mr. Woolf," came the reply.

"Who?" replied the boy.

"Woolf," replied the wrong number.

Well, who's afraid of you?

What's the Use

Mrs. Brown was anxious to let her neighbor know about her new car.

"I'm thoroughly tired out," she said. "I've been at the wheel all day."

"I can sympathize with you," replied her neighbor. "I've been doing my mangle, too!"

Would Be Help

Inventor Working On Gadget To Aid After-Dinner Speeches

A Chicago inventor with an eye to giving aid and comfort to suffering humanity has come up with a machine that regulates the length of addresses by after-dinner speakers. This is a great step forward. It is to be fondly hoped that the gadget not only is foolproof, but that the inventor sets to work immediately on the mechanical additions or adjustments necessary to improve the quality of speeches. Most habitual listeners, however, would settle for an attachment to tune out at any time.

—New York World-Telegram.

FARMER SEEKS STRAY COW, DISCOVERS FAWN—A two-day fast was followed by this fawn after it was discovered by Harry Baker, Orange, Va. district, Ont., farmer, while he was looking for a stray cow. Now accustomed to its new surroundings, "Bambi", as he has been christened, welcomes food from Mrs. Baker.

A VALUABLE GIFT

The American Red Cross recently presented its Norwegian sister organization with a most valuable gift. Fixtures sufficient to equip the new hospital for feeble minded children soon to be erected in Oslo will be shipped from the United States in the near future. The gift includes linen, fertilizers, complete dental equipment, surgical instruments, washing machines, and a complete set of the most modern kitchen machines and equipment.

PRODUCED LICENSE

Joseph Zamoiski, of Baltimore, says he was driving his car—and fast—when a Virginia state trooper waved him down, and said sarcastically: "Let me see your pilot's license." Zamoiski, a pilot pulled out his airplane papers. The officer laughed, and let him go with a warning to slow down on the ground.

The air at high levels is cold because it doesn't absorb much heat and doesn't easily retain it.

INTERESTING STORY—

"YOU KNOW WHEN IT HAPPENS"

By MATTHEW F. CHRISTOPHER

Wheeler Newspaper Syndicate (Copyright)

HE WAS a farm kid, and like some farm kids he had a slight stoop to his shoulders. His face was nearly raw from sunburn, but his blue eyes had a vivid sparkle like. And his reddish hair had a crispness to it like toast.

They stood together on the cinder driveway, with the moon hanging like a pumpkin up there in the sky. Light beamed from the windows of the garage where George and Carl were tinkering on a motorcycle.

"You know something," she said, low and serious. "I thought you'd be happier tonight."

He looked at her. A speckle of light glinted in his eye. "What makes you think I'm not?" She laughed. "I can tell."

"Mind reader?" "No. Lip reader." Her brown eyes shone. "You haven't kissed me, yet. Or don't you want to?"

He grinned. He lowered his head so that his lips met hers. There was slight pressure behind them, and something electrical that tingled her finger tips. But it was brief—and he hadn't put his arms around her.

"You're sweet," he said. "I like you." "That's because you don't know any other girl, if what you told me last night is true."

"It is," he answered. "What's more, I never kissed any other girl but you. How could I? Living alone with my father and mother, with no brothers or sisters, and working almost every minute of every day since I was old enough to carry a hoe."

She stared. "You never went to school?" His eyes laughed. "Since when isn't that work?"

"You!" she exclaimed, and grabbed his hand. "Come on. I'll introduce you to my brothers—then we'll start for the movie."

She walked in, pulling him. Her brothers were coveralls smattered with grease.

"Hello, boys!" Edith said. "George—Carl. I want you to meet Jerry, Jerry Worden."

The boys lifted dirty hands. Jerry laughed. "I wouldn't mind, but maybe your sister would. I'd be glad to next time."

On their way to the theatre he said, "They act like nice guys."

"They're always tinkering—far into the night, usually." Between her brows were the thin veins of a frown. "But what are we doing talking about them?" He looked at her. "What shall we talk about?"

She met his eyes, and saw how the moon tinted them a soft yellow. She pressed his arm closer to her, and was conscious of a deep pounding in her breast. She wondered if she were really falling for him.

"Let's talk about you," she said. "I know, you told me you were lonely. You said you didn't have any friends. You said maybe a girl is what you wanted, to sort of adjust

you to the kind of living you think you need."

"Well, that's true. Anyway I guess it's true." A frown crossed his forehead. "Why bring that up now?"

Her heart was a painful beat. But she couldn't tell for sure. Love was intangible. You either had it or you didn't.

"You're not happy now," she said. "I guess I just don't appeal to you."

"You're talking crazy. How do you know how I feel toward you? How do you know that right this minute I don't feel like grabbing you up in my arms, holding you tight and kissing you like a guy never kissed a girl before? How do you know?"

"Look," he continued. "I never felt good until I met you. Get that through your head. You were all I needed to set me right. I know it as sure as I am born. Now, do you believe me?"

"I believe you," she whispered. A tear dropped upon her cheek.

THEY left the movie, had a milkshake, and he walked her home. If they could always be together like this, she thought. It would be wonderful.

He kissed her at the door, a long, cherishing kiss—the kind she had wanted before. The kind she was hoping he'd give her. She went into the house smiling, and her fingers were tingling stronger than ever now with that electrical feeling.

TWENTY minutes later the kitchen door opened and George came in. He was grinning triumphantly. He and Carl must have got the motorcycle fixed, she thought, and she smiled. Those kids!

"Hey, sis!" George said. "Get me some lemonade, will you? For three?"

She stared at him. "Three?" "That's what I said," George said. "Carl, me, and your friend, Jerry."

Trance-like, she poured out the lemonade, and handed it to George, who took it out on the tray.

She was sure of it, now. Jerry didn't come back to repair the motorcycle. The motorcycle was the path he took to return to her.

A soft smile played across her lips. She set the magazine face down on her lap, an adrethed her head against the back of her chair. She was looking at a fly creeping across the ceiling, but really, she wasn't thinking of the fly at all.

WEARS HAND-ME-DOWNS

Young Canadians may feel better about wearing hand-me-downs, suggests the Brockville Recorder and Times, when they learn that, because of her lack of clothing coupons, the Princess Elizabeth to some extent wears clothes which originally belonged to her mother and have been altered to fit her.

OUR COMPLETE SHORT STORY—

FATHERLY PERCEPTION

By MARGARET ELSOM

Copyright
Whitely Newspaper Syndicate

WE HAD BEEN married about ten months when I said to Marie: "Darling, just how much do you think we could scrape up to buy a car—just a cheap one, any kind just so long as it goes?"

Marie was washing the supper dishes at the time, and up-well I was drying them for her, and I'm not hen-pecked either! I'm only too pleased to think that I have such a fine girl as Marie for my wife. Gee, but I love her. And here we are, working on a fruit farm, 50 miles away from our nearest relative, and six miles from the nearest town. Once a week we managed to get into town with Mr. Kayes (my boss). But when a man expects to become a father in two months' time, he wants to make certain he has a definite way of getting to the variety ahead of time.

Whenever I thought of the stork it sent the chills up and down my spine, and I envisioned it speeding through the stratosphere—or wherever storks do their speeding—some, breathlessly trying to obtain transportation for myself and Marie. It won't be a nice visit, but, it gave me "stork fever", and now as we're doing the dishes the lanky, feathered flying animal loomed closer than ever, and that was the reason why I had asked Marie about a car. Marie sighed a little. "Yes, things sometimes happen before schedule. I think we could manage a cheap car, say around \$200.00."

I finished drying the Blue Willow cup—and also finished the cup's usefulness. Whenever I'm drying dishes, the tea towel seems to have a habit of getting mixed up in the handles of the cups, and when I go to set them down and pull the towel away, it doesn't come clear (that's the second cup I've broke in the last three days). It really gets a man down when he's expecting the stork.

There had been an ad running in the paper along these lines: "For sale, Model A, good running order, five good tires, motor recently overhauled. Ceiling price: Phone 264." Marie agreed it might do.

I threw the paper aside and went over to the telephone to ring the number, while Marie stood biting her nails. A squeaky little voice answered:

"Yup, this here's the place, Mister—car ain't sold as yet, she ain't, but she's likely right smart 'goin' to be. You don't see bargains a-caboodle, under your nose like this every day; no sir. She won't be settin' here long, no she won't, so you want to grab her right quick."

The man breathed and I had time to say, "How much?"

Two and a half as she stands—right ready to exultate down the home stretch—yes sir," he said. I felt the concussion of the extra \$50.00 I went through the ceiling, but I thought I might be able to bring him down a bit. I reached for my hat and coat and made a dash to catch Mr. Kayes, on his way into town to lodge meeting. I yelled to Marie, that I wouldn't be long, and to keep her fingers crossed. She looked so lovely, standing in the doorway, hugging the Persian cat, which we had called Donald, but which had to be changed to Donnie. (I never was much of a farmer).

It happened that the owner of the car was a very old gentleman who thought that his rheumatism wouldn't let his leg move fast enough to "break" her when she needed it. He was slightly stubborn over the \$50, but I won out. In half an hour I was riding down the front street, proud as any expectant father. I felt I had obeyed my "premonition" to get a conveyance—and my heart sang. So excited was I that I pulled her over to the curb and went into the corner drug store to "phone Marie.

"Darling," I said, "we are the owner of a \$200 automobile—and it runs." She sounded excited. "What's the matter—you're all right, are you?" I asked breathlessly.

"Oh, yes, dear," she said, "but hurry home—it's crossed." My heart ceased to beat, and the booth went all black for just a moment, but, pulling myself together, as an expectant father should, I told her to get right into bed. I would be home immediately. It had happened—and her, all alone, and—and at the telephone! Why it was impossible. But she said it had happened. Oh, the poor darling.

I jumped into the car, and raced around to Dr. Gille's. He was just changing a tire in his garage. I streaked across the lawn and pulled him toward my human car, explaining what had happened. "I'll take you out, doctor—I'll take you out—never mind your fat tire—I'll run you out to Marie right away."

"But—but, my dear man," he said, "let me at least get my bag."

He rushed to the house, coming out again in two seconds flat. Jump-

ing in the car, he asked, "Did you say she answered the 'phone'?"

"Doctor—yes—yes, and I told her to get right back into bed, I'd be right out."

"Incredible," he mumbled, "incredible." "Will that hurt her?" I pleaded. "Will what hurt her?" "Incredible!" I said. And still don't know why the Doctor grinned. Well, the old car snorted up the hills, and back-fired down them. Leaning heavy round the bends, she ticked off the six miles quick. A cow got in the way once. I pressed the horn button, and it went. "Br-r-r-p!", and unthinkingly I said, "excuse me."

Looking back, on that evening, I sure feel like the fool that I was. As long as I live, I'll never forget the scene when we opened the door. There was Marie, on her hands and knees, over a cardboard carton which held Donnie and five newborn kittens!

I had to wait six more weeks before I became a father!

SELECTED RECIPES

FISH—FRESH OR FROZEN

Fish is a menu favorite whether caught by the amateur angler or chosen from the stock of fresh or quick frozen varieties. Its popularity is well deserved, too, from the point of view of food value and variety.

Take mackerel for instance. Research shows this fish to be a good source of three important B vitamins, as well as good quality protein. Mackerel contains considerable fat and for that reason is best baked or broiled.

One of the most delicious and one of the simplest ways to prepare small fresh fish or filets of large types is by oven frying. This method cooks the fish quickly and gives it that crisp golden crust about which gourmets rave.

Oven-Fried Fish

1 pound fish filets
1 cup milk
1 tablespoon salt
4 cups corn flakes

4 teaspoons cooking oil
Dip fish in salted milk, then in finely crushed corn flakes. Arrange on well-oiled baking sheet. Sprinkle with oil. Bake in very hot oven (300 deg. F.) 12 to 15 minutes. Yield: Four 4-ounce servings.

Boiled Mackerel

3 to 4 pounds fish
1 teaspoon salt
1 teaspoon paprika
2 tablespoons melted butter
Have whole fish split and cleaned. Wash thoroughly and wipe with a cloth. Mix salt and paprika with melted butter and brush over fish. Place fish skin side down in greased broiler rack. Broil 2 inches from heat about 10 to 15 minutes, until brown and flesh flakes when tried with a fork. Serve at once with servings of lemon. Yield: 6 servings.

NEW DRESS UNIFORM

Britain's peacetime army is to have a new ceremonial all-weather uniform. The dress committee of the war office announced that it will be of blue serge with a stand-up collar fastened at the front like the old patrol jacket uniform.

We're always hearing about these "zero hours", in various disputes. It's a good name, because nothing happens at those hours.

DEFACING BOOKS

Is Strictly Against Library Rules But People Do It

Books owned by oneself may be marked just as much as the owner likes; but it is an impertinence to make notes on books owned by the public and loaned from the public library.

Everyone who borrows books from the library has a right to get them fresh and unsoiled by foolish marginal notes, or underlinings. Apart altogether from the ethical side of the case, it is against the rules of the library to deface books.—Ruelph Mercury.

Beyond The Horizon

There is Always The Unfolding Of

Wherever one may be, there is always a horizon, the boundary of the world one sees, the line where earth and sky would seem to meet.

A city presents a disorderly skyline—spires, apartment houses, and office buildings crowded pell-mell—but nature's myriad skylines are peace and majesty, whether it be rolling hills, blue line of sea, feathered edge of forest or towering mountains.

As the wanderer moves, his skyline moves, and as certainly as there is always a horizon, there is always a beyond. The unknown lying beyond the horizon has tempted the seer since the beginning of history. It has lured me into rough seas and bleak wildernesses.

In his long journeying no traveler ever reached the horizon. It lay forever beyond his grasp, a tantalizing line on the rim of the sky, extending mile challenge.

There is, one might think, a hint of the eternal in the horizon and a hint of infinity in the beyond. The promise of the skyline is not barren. Always there is the fulfillment—the aloof unfolding of new lands—Montreal Gazette.

A smart man is one who possesses enough judgment to use his own.

SMILE AWHILE

"Yes, my wife gets more out of a novel than anybody."

"How's that?" "Well, she always starts in the middle, so she's not only wondering how it will end, but how it began."

"Your wife is a very sympathetic woman, isn't she?" asked Robinson.

"Yes, very," replied Smith. "She works on the theory that you can find whatever you want when you don't want it by looking where it wouldn't be if you did want it."

Two actors, both jealous of each other, met in the Strand.

"Hello," said one. "How are you getting along?"

"Not so badly," said the other; "keeping alive."

The first man eyed his rival for a moment, then asked casually:

"What's your motive?"

The two survivors of a shipwreck, a seaman and a stockbroker, had clambered on to a raft.

"If a ship doesn't sight us soon," said the seaman, "we'll starve."

"Don't talk nonsense!" snapped the stockbroker. "I've got plenty of money."

An Aberdonian, living alone, had an early morning train to catch. Being a heavy sleeper, he was afraid he would not wake up in time. Several possibilities presented themselves, but every one meant a tip.

In the end, he addressed an envelope to himself and posted it without a stamp.

Early next morning there came a thunderous knock on the door. The stockbroker climbed out of bed and opened the window.

"Here's a letter for you," called the postman. "Fiveness to pay."

"Take it back," commanded the Aberdonian. "Carelessness like that doesn't deserve to be encouraged."

An Irishman wanted to take his donkey by train, so when he got to the station he asked where he should put it.

"At the back of the train, the stationmaster told him.

The Irishman then got into his carriage and after about an hour's travelling he asked a fellow-passenger: "And how fast might we be goin' now?"

"About sixty miles an hour," he was told.

"Begorra!" he exclaimed. "My Niddy must be steppin' out!"

CANADIAN WINS CAMBRIDGE HONORS—Completing studies in one year which normally require two years at Cambridge University, England, Harry G. Johnson, Toronto, passed his Part II Tripos with first class honors.

Two For One

By ANNE ADAMS
A darling dress, this frock and panty set! Pattern 4612 buttons down front for easy wearing and ironing. Two versions: for playtime, for dress-up. Panties may match.

Pattern 4612 comes in sizes 2, 4, 6, 8. Size 6, puff sleeved frock, takes 1 1/2 yards 35-inch fabric. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Family Politics

Teens: "Miss Coy, I'm a candidate for your hand."

Miss Coy: "Very well. How much of an allowance do you promise to allot me a month, am I to be the boss of the house or are you. Who is to do the cooking, how many days shall I have off each week and what is your attitude towards members of my family who may want to live with us. In short, what is your platform?"

The bayonet was named for the city of Bayonne, France, where the weapon was developed in the 17th century.

NEW CZECH PREMIER—Communist Klement Gottwald became the new premier of Czechoslovakia after his cabinet was approved by President Edvard Beneš.

Under Some Conditions

Over-Exertion Even In Simple Games

Can Be Dangerous

The Wichita Falls, Texas, man who put so much energy into a demonstration of his favorite golf swing that he broke both legs in the effort, really gave a demonstration of how dangerous over-exertion can be. Professional athletes talk now how easy it is to injure or break an arm or leg by a sudden twist of these members. Golf is not regarded as the most strenuous of games, but the above circumstance indicates it can become so under certain conditions. All anyone has to do to find out how easy it is to get "out of condition" is to resume some work or game that has not been participated in for some time. The sensible thing to do is avoid exerting oneself to the limit, keeping in mind one's age and physical condition.

Peaches were introduced into England from Persia in 1562.

Soothe your irritated eyes with Murine

MURINE EYES

Are your eyes sensitive to strong lights? Then cleanse and refresh them with Murine. And use Murine when eyes are irritated by sun-glare, dust, driving, reading, hay fever or factory fumes. There are seven important ingredients in Murine. Two drops in each eye soothes and comforts very quickly. Ask your druggist for Murine.

CANADIAN ARMY MAN RETURNS HOME TO FIND DREAM COMES TRUE—A 25-year-old dream came true for Pte. Donald Millin as his six sisters met at the home of Mrs. Eva Smith, Leaside, Ont., to welcome him home from overseas. Top row shows Eva and Grace; second row, Daisy, Pte. Millin and Beat; bottom row, Mary and Jean. The family had been apart for a quarter century. Girls came from Cleveland, Ohio; Devon, Connecticut; Tampa, Florida, and Providence, Rhode Island.

The Scribe

BY PUBLIUS

This series of articles is written especially for The Olds Gazette, but the opinions expressed herein are not necessarily those of this publication and we accept no responsibility for views expressed therein. Ed. Britain's greatest modern writer of history, H. G. Wells is now dead. But what he wrote will very likely live on, because he wrote in a clear, unmistakable manner, on the basic fundamental problems of man, in this our modern scientific world. This of course applies especially to his most important work, "The Outline of History".

Undoubtedly, Wells popularized history more than any previous writer. He made this subject accessible to millions through his technique in presentation and his sheer matter-of-fact truthfulness. These same millions now read the "Outline" because they feel that there is a clear, unbiased, impartial presentation of mankind's struggle from the very beginning to the present time and it is so comprehensible, so simple. This is a real accomplishment. Few historians have been able to do this.

It is a noteworthy fact that until the advent of Mr. Wells, history was too often a dry, dead subject, a mere listing up and recording of events, such as the colonization of countries, the struggles of blood-thirsty kings, and the rise and fall of empires and of nations.

In this method, there was no definite objective, nothing constructive, and little or no positive effect. To a degree, it is still the method of our schools and universities. But Wells infused life into the subject. He gave history a soul and he gave it a goal.

How did he give history these qualities, and how did he turn it into a living subject? He did this by following in the footsteps of Voltaire, the great French philosopher who said, "Truly the history of the Yorkists and Lancastrians and many others is much like reading the history of robbers. In all nations history is disfigured by fable, till at last philosophy comes to enlighten man; and when it does finally arrive in the midst of this darkness, it finds the human mind so blinded by centuries of error, that it can hardly unceive it. It finds ceremonies, facts, and monu-

ELKS' FUN FROLIC SEPTEMBER 20, 21

The Olds Elks Lodge No. 100 will hold their annual carnival and Fun Festival in the Aena on Friday and Saturday Sept. 20 and 21. It's the big fun festival of the year. Plan now to visit Coney Island.

O.S.A. Make Many Improvements Priority Basis for New Enrolment

Applications for admittance to the regular courses at the Schools of Agriculture for the term commencing next October 22nd, have been reviewed by the Application Committee.

The Schools at Olds and Vermilion have applications for almost double the number that can be accommodated in the dormitories and less rooms. Priority is therefore being given to the applications of

Cecil Noad in Agriculture, Joyce Mitchell, Mary Parkinson and Isabelle Phillips in Home Economics. Rosetta Moore of Garfield will be taking the two-in-one course in agriculture together with Lois Moore of Olds.

Many prospective students have applied for admission to the O.S.A. from other provinces, especially in Saskatchewan, British Columbia, Manitoba and Ontario. Enquiries will also be used as a potting room and as a storage space for bee equipment. It is planned to have a small field just south of the dormitory transformed into an athletic park on the east and picnic grounds on the west for use by the students. A hockey rink is to be built east and south of the dormitory. A bowling green and tennis court also come into the plans. The main entrance to the school

X-servicemen and older applicants. The applications of younger men will be held over for the 1947-48 term.

The O.S.A. can accommodate approximately 75 girls and 125 boys. There will be a few students in excess of 200 as several who home res at Olds will be in attendance among the local students will be

Mr. Putnam, Minister of Agriculture for British Columbia and his family. Dr. Munro, were recent visitors to the O.S.A. Dr. Munro's son, Eric, will be a Second Year student at the school this fall.

Several plans for improvement are being considered for the O.S.A. greenhouse is now under construction and a class room will be built adjacent to it. This class room

TO SEND A ROCKET

Prof. Alexander Annoff, director of astronautics at the Sorbonne University, Paris, who hopes to send the first atomic energy rocket ship to Mars "by 1960". The well known scientist, surveying the future possibilities of nuclear energy, explained that no humans would be aboard the first inter-planet rocket ship for the building, 40-million-mile "switch" through space. He estimated it would take fifteen days to reach Mars, proposed speed, schedules are maintained.

is not yet available. The colour of the jackets and tunics is exactly the same as the colour and the material of the trousers.

The trousers are of a modified civilian cut and carry the traditional regimental stripe. Those infantry units which wore a red welt on their trousers have now got one-inch red stripes. Other infantry regiments now wear yellow and green stripes. The Highland Regiments will keep to the kilts, the Lowland regiments to the trews. On ceremonial occasions all ranks will wear forage caps as they wore before the war. For other occasions a dark blue beret will be worn, except by those regiments which have been permitted to wear traditional hats. On all informal occasions, all ranks will have a blue cloth belt.

IMPORTANT NOTICE

to all Farmers entered in
\$25,000.00 National Barley Contest
Sponsored by the Brewing and Malting industries of Canada

BARLEY QUOTA INCREASED

to producers of malting barley

Under new instructions issued by the Canadian Wheat Board "there may be delivered from each farm, covered by a delivery permit book, one full carlot of barley accepted by a maltster or shipper and upon which a premium is to be paid for malting purposes.

This means that while the general barley quota remains at ten bushels per acre contestants in the National Barley contest and producers of malting barley obtaining a premium can ship up to one full carlot.

A premium of five cents per bushel will be paid on carlots of barley selected for malting.
